No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                        Score

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The TNF-alpha tip peptides given in AAR60232-42 were modified with
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Disclosure; Page 61; 132pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   New tumour necrosis factor -alpha muteins, antibodies and antisense peptide(s) - used in the treatment of diseases and
region of mouse TNF-alpha, for treating oedema. The peptides form pharmaceutical compositions for treating oedema, especially pulmonary oedema. The peptides are non-toxic, whilst retaining the oedema resorption-inducing capacity as TNF. The present sequence represents a specifically claimed TNF-alpha circularised peptide from the present
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       AAY82197 standard; peptide;
                                                                                                                                                 The present invention describes the use of peptides comprising a chain of 7-17 contiguous amino acids derived from the Ser100-Glul16 region of human tumour necrosis factor-alpha (TNF-alpha), or Ser99-Glul15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Mus sp
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Tumour necrosis factor alpha; TNF-alpha; human; proinflammatory; pulmonary oedema; cyclic.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Tumour necrosis

                                                                                                                                                                                                                                                                           of 7-17 contiguous amino acids derived from the Ser100-Glul16 region of human tumour necrosis factor-alpha (TNF-alpha), or Ser99-Glul15 region of mouse TNF-alpha, for treating oedema. The peptides form pharmaceutical compositions for treating oedema, especially pulmonary oedema. The peptides are non-toxic, whilst retaining the oedema resorption-inducing capacity as TNF. The present sequence represents a murine TNF derived peptide used in an example from the present
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         invention

                                                                                                                           AAR60233 standard;
                                                                                                           AAR60233;
                                                                                                                                                                                                                                                                              The present invention describes the use of peptides comprising a chain of 7-17 contiguous amino acids derived from the Ser100-Glul16 region of human tumour necrosis factor-alpha (TNF-alpha), or Ser99-Glul15 pharmaceutical compositions for treating oedema. The peptides form oedema. The peptides are non-toxic, whilst retaining the oedema resorption-inducing capacity as TNF. The present sequence represents a murine TNF derived peptide used in an example from the present

A modified version of this sequence is claimed in which at least one of the channel residues is substituted (see Features Table). The resulting TNF-alpha mutein has modified channel activity compared to wild-type.

TNF-alpha muteins were constructed in the tip region (given AAR60331) of mouse TNF-alpha. The mutations resulted in: modulation of lectin-like activity; reduced toxic activity; modulation of inflammatory activity; modulated adhesion molu

                                                                                                                                                                                                                                                    Drugs acting on withdrawal symptoms contain TNF, esp. TNF-alpha (AAR38069 and AAR38077), rTNF-S-AM1 (AAR38070), rTNF-S-AM2 (AAR38071), thymosin-beta4-TNF fused cpd. (AAR38072-76). The drugs are effective in treatment of withdrawal symptoms caused by habitual use of alcohol, morphine narcotics or nicotine in humans administered as TNF at a dose of 10ng-10mg orally or 5ng-1mg i.v. or 50ng-50mg percutaneously a day for a human adult. In animals, the drugs may be administered as administered as the drugs may be administered according to the human dosage (1/60 per kg body wt.).

XX
XX
CC The sequence encodes tumor necrosis factor which is an antitumor
CC agent and a lymphokine. This sequence is the same as that in
CC AAP70557 but has 16 extra amino acids at the N-terminal.

It can also act synergistically with interferon C;Comment: TNF-alpha and .beta (lymphotoxin) are the products of different gene ut are produced by different cell types and have different induction kinetics.
